B200

*Enjoy your garden and patio
all year round*

*Experience
your holiday at home*

B200

Expand your living space

The perfect outdoor space
tailored to your home, garden and budget

B600

This pergola is
open to many things

Minimalism
is its asset!

The fabric roof is held tightly into the guides thanks to the continuous tension of the ZIP screen technology

For more privacy, you can close the sides of the B128 entirely with a fixed side canvas and ZIP screen

Optional adjustable foot

Water drainage through supporting posts

LED lighting options possible in the side guides, the supporting posts or under the support beam

In open position this light terrace roof disappears almost completely in the decor of your patio

B128

SOMFY remote control included

The B128 pergola is a minimalistic aluminum terrace cover with a sun and rain resistant roof that uses ZIP-screen technology. The system keeps the canvas tightly stretched with efficient tension mechanisms in the side guides for wind resistance, so without sides flapping up. This smooth surface and the minimal slope of 15cm/m ensures that every drop of rain quickly flows into the invisibly integrated gutter in the front profile.

When closed it offers all the advantages of a real roof, when fully open the B128 pergola disappears and is as good as invisible. The B128 has also a lot of LED lighting options. You can even change the height of the roof thanks to an optional manually operated supporting pole.

More options and specifications on p. 30

- Light yet robust frame
- Regulate the perfect amount of light, sun shading and ventilation

Options

- LED lighting in the side guides, the supporting posts or under the support beam
- Possibility to manually adjust the height on one side
- Water-repellent wall connection
- Wind- / sunsensor

B128

- Aluminum terrace cover with a rain resistant fabric
- Canvas based on ZIP-screen technology
- Crossing possible at 1/3 from the extension to max 1 m

5,95 m x 4,5 m (B150 XL)

17,83 m x 3,5 m (B150)
17,5m x 4,5 m (B150 XL)

Standard colors

Optional: manual operation

Water drainage through the gutters directly in vertical posts

Optional frame-mounted screens

*Well-considered and elegant design
meets comfort*

Extra wide louvres
for a streamline look

B200 B200 XL

The B200 family suits the most diverse combinations. As shelter, stand-alone, cross- or L-shape. It is certainly the most versatile pergola on today's market. The ideal way to increase your living space!

More options and specifications on p. 30.

Optional LED spots integrated in the frame

Direct (DOWN) and/or indirect (UP) LED lighting on the gutters is optional

The integrated **ZIP screen** is a vertical windproof and insect repellent screen. Thanks to its ingenious zip system, the screen will be kept perfectly in the side guides of the supporting poles.

Optional door profile

Possibility of coupling different modules

Possibility to have overhang up to 2 m and up to max. 1/3 of the surface

Modern design without visible screws

Water drainage through the gutters directly into the supporting posts

B200 B200XL

SOMFY remote control included

The B200 (XL) with rotating louvres is definitely our finest outdoor pod from the Brustor Outdoor Living range. Every option, application and lean-to possibility makes part of the repertoire of the B200 (XL). This versatility is turning this pergola into the absolute champ of our Brustor range.

Create your own oasis of relaxation in opposition to the daily rush. A B200 knows no bounds only possibilities...

More options and specifications on p. 30.

- Stand-alone or lean-to module

2 extra supporting poles)

Standard colors

frame only

*Your reference for
outdoor living pods*

Extra light during mid-season

B300

 **SOMFY remote control included**

The B300 is a highly aesthetical aluminum outdoor living space with a waterproof sliding cover. The fabric can be partially or completely opened for optimal incoming sunlight. Unfolded, it guarantees a perfect sun shading or a shelter against the rain. Thanks to an ingenious roof construction, the water is drained indirectly. The B300 can be fixed on the wall without an extra inclination.

More options and specifications on p. 30.

- Stand-alone or lean-to module
- Motorised sliding cover
- Coupled version possible along the length
- Regulate the perfect amount of light, sun shading and ventilation

Options

- LED spots integrated in the frame
- LED lighting on the gutters UP/DOWN in white/RGB
- Integrated ZIP screens

B300
• Sliding cover

Max dimensions

 7 m x 4 m (single roof)

 7 m x 7 m (double roof)

Standard colors

Wide selection of watertight fabrics.

Optional built on screens to keep out the evening breeze

B600

 **SOMFY remote control included**

The B600 Outdoor Living is the innovative continuation of the proven technology of the B200 family. Its elegant, S-shaped louvres not only allow you to rotate, but also open to any position. With the roof completely open, the remaining roof surface only takes a mere 13%. Ideal for an optimal light in the mid-season.

The atmosphere lighting options for the B600 create a trendy mood on the undulating louvered roof, while the LED spots on the L-side provide direct and downward light.

For larger surfaces, you can couple different modules of the B600. A small amount of sun, a lot of sun or even a little bit of rain ... The B600 adapts as a real convertible!

More options and specifications on p. 30.

- Regulate the perfect amount of light, sun shading and ventilation
- S-shaped louvres for a better water drainage
- When opened the remaining roof surface takes a mere 13%
- Water drainage with 4 coupled gutters.
- Roof looks more elegant with the graceful louvers.

Options

- LED spots on the L-side
- Direct LED lighting on the gutters (DOWN)
- Ledstrip in louvers

 **B600**

- Rotating and sliding S-shaped louvres.
- Option Built-on screens

Max dimensions

 6 m x 4 m (single module)

Standard colors

 

MAXIMUM SUNLIGHT

With the B600 you can open the slatted roof almost completely: all S-shaped louvers slide together very compactly which opens the roof for 87%. The louvers' S-shape lets them join together more compactly but it also ensures an easy water evacuation.

In addition, the S-louver is extra strong and durable due to its typical shape. The louvers rotate up to 135° so you can regulate them optimally, at any time of the day.

When the roof is fully open, the louvers only cover **13%** of the total surface!

COUPLED PATIO ROOFS ARE EXTREMELY SUITABLE FOR THE RESTAURANT BUSINESS

The Brustor patio roofs are extremely suitable for the food service industry, as the B200(XL) for instance can be mounted in the most various combinations. Single, fixed to the wall, built-in, coupled, in star- or L-shape. That way every large terrace surface can be provided with a customized roof. It is definitely the most versatile patio roof which is on the market today. Guests will certainly appreciate your terrace. Thanks to its many options the pergola can be completely personalized. If there is too much wind, the screens can be closed; if it gets dark, you can use the atmospheric

LED lighting and in colder weather the heater provides a pleasant radiant warmth. These are all details which will enable your guests to dine and enjoy longer, despite the weather conditions. Furthermore, Brustor works exclusively with sustainable materials and sets the bar very high with respect to quality. You will undoubtedly find a solution which meets the needs from both yourself and your customers completely. Investing in a patio roof will therefore be a great added value for your business.

1

Rain and/or snow sensor

The optional rain sensor detects the first raindrops and automatically closes the roof. A very useful option when you are away from home.

When it starts to snow, the sensor automatically opens the louvres completely (up to 90°).

2

Patio heater

Powerfull 2.000W heater (IP65) for fresher evenings. Multiple patio heaters can be combined for just one module. Available with standard or dimmable RTS receiver to operate with Telis RTS transmitter. The dimmable version can adjust the heater to 100%, 80% or 66% of its total capacity.

Black, white or anodized finish.

3

LED lighting

The Brutor Outdoor Living Pods can be equipped with a wide range of lighting possibilities. Indirect or direct, UP or DOWN lighting or even both. Dimmable white or RGB LED strip or LED spots.

For more information about which lighting can be added to which pergola see the overview on page 35.

4

Standard colour or RAL

The Outdoor Living is available in 2 standard colours: RAL 7016 anthracite grey textured and RAL 9016 textured. It is also possible to order the frame and louvres in a different colour.

RAL 7016 TX

RAL 9016 TX

RAL 7039 TX

More than 200 other worthy RAL colours are available as an option.

only frame B200(XL)

5

Coloured glass fibre fabrics

The screens and the glass fibre fabrics have an extended collection of colors and designs. Your dealer will be pleased to show you the complete collection.

Woven screens are not entirely water nor lightproof.

OPTIONS

CUSTOMIZE YOUR PERGOLA

Do you want more comfort or to personalise your terrace covering? Choose from our wide range of options. For example add some LED lighting for an atmospheric effect or a patio heater which will warm your guests on cooler evenings.

Choose your favourite colour for your outdoor living pod and screens to add the ultimate personal touch. Discover all the possibilities on this page, which we provide immediately at the installation or can also be added easily at a later stage.

6

Different types of pole supports

8

Audio

7

Screens

Depending on the type of pergola, you are able to integrate ZIP screens almost invisibly in the structure. Or they can even be mounted onto the frame afterwards (B150/B600). Brutor can provide windproof (ZIP) screens up to 6m width. The screens can be equipped with transparent and windproof crystal windows with a height of 1,21m. These transparent PVC windows are finished with 20 cm of screen fabric. The windows will increase the visual comfort.

TECHNICAL ASSETS

SOMFY REMOTE CONTROL INCLUDED

There is a matching transmitter according to the desired number of options or commands, from 1 to 16 channels... The louvered roof, the screens, the lighting and the electric heater can be easily operated with the transmitter or with your smartphone.

BRUSTOR GUARANTEES A HIGH DEGREE OF FINISHING

Modern design without visible screws

Perfectly integrated screens: almost invisible in the frames

Choice between 2 widths of louvers (16 cm or 21cm)

Patented corner reinforcement in the posts for a solid construction

Patented LED strips in louvers

Invisible and adjustable pole support in case of unevenness. Patented

Stand-alone or lean-to module, for every space
there is *a tailored solution*

- 1 Stand-alone version
- 2 Stand-alone with overhang
- 3 Coupled roof
- 4 Coupled roof with door pole
- 5 Coupled in length or width
- 6 L-configuration
- 7 Lean-to version
- 8 Star configuration
- 9 Lean-to with door pole
- 10 Lean-to version with overhang
- 11 Only roof

LEAN-TO POSSIBILITIES (depending on the type)

The Brustor Outdoor Living constructions are perfect to match every installation. The applications depend on the space and use. The aluminum systems can be used as frame only, lean-to module with 2 posts, lean-to module with 4 posts or as stand-alone. Larger roof constructions have 2 roof elements, each with motor. These can be operated together or separately. Bigger areas can be covered by coupling the necessary elements, along the length or width.

CUSTOM-MADE

Do you have certain preferences or need specific dimensions? Our outdoor living pods can be custom-made according to your specifications. Our craftsmen have the necessary expertise to manufacture them precisely.

5 YEARS OF BRUSTOR WARRANTY

An "Outdoor Living" is a high quality, aluminum, automatic sun shading system with a precise mechanism. This construction is particularly water repellent but complete water tightness is not guaranteed. The construction and the aluminum louvers resist wind speeds up to 120km/h and were CSTB tested. The included warranty certificate contains more technical information and tips to enjoy your BRUSTOR products for many years. BRUSTOR products have a warranty period of 5 years. For a complete overview of the warranty, ask for our specific sales conditions.

Exception: LED lighting and heaters have a 2-year warranty. Electronics has a 3-year warranty. 5 The motor has a 5-year warranty.

SPECIALISTS IN OUTDOOR LIVING, AWNINGS & SCREENS

THE SUCCESS OF A FAMILY BUSINESS

Brustor is a family business that manufactures outdoor living pods, awnings and screens for decades. Innovation, quality and a high level are still the key to our success. Together with our many years' experience, we are able to respond to every demand.

LEADING COMPANY IN EUROPE

Through the years Brustor, a family business, has become a strong player in the international market of sun protection. The in-house production occurs in our new, 50.000m² production hall in Gullegem (BE), from where our products are transported worldwide to 30 countries. Even our warehouse continues to grow so we are able to supply the orders very quickly.

OUR PEOPLE MAKE THE DIFFERENCE

Our most important capital are our employees. Highly skilled people who always go the extra mile. Whether they are operating machines with greatest precision, accomplishing a commercial role, implementing installations or studying innovating techniques; each and every one of them is an experienced, motivated, customer oriented person with a passion for quality.

STATE-OF-THE-ART MACHINES

Top quality products demand well-oiled machinery capable of handling the most advanced production and assembly techniques. Operated by highly trained people, our state-of-the-art machines are the acme of precision. High productivity guaranteed. Thanks to a modern powdercoating system, each colour can be realised on our own site.
