

# About Broadview

Established in 1969, Broadview is today a leading supplier of premium bespoke outdoor shading solutions to both commercial and domestic markets. Over the years, we have built an enviable reputation as being one of the leading bespoke outdoor shading solution providers in the country, having worked alongside renowned designers, architects and developers on a number of prestigious projects in the UK.

Our commercial team works with a wide range of clients including hotels, pubs, restaurants, cafés, retail outlets, offices and schools across the UK to create the perfect outdoor shading solution.

From our head office in Poole, Dorset, we offer a complete service from initial advice on your project followed by the design, supply and installation.

Our range of parasols, awnings and giant umbrellas offer flexible summer shading and can be conveniently stored away for winter. Alternatively, our pergola systems can be designed for all year-round usage. Bespoke design features include heaters, LED lighting and options to create a fully enclosed space.

# Parasols

We offer a range of stunning parasols for cafés, pubs and restaurants - perfect for dining and drinking outdoors while providing shade and protection against the summer sun.

The Broadview parasol is ideal for all leisure and hospitality clients to enable them to fully utilise their outdoor space during the summer season. These elegant parasols can be designed with LED lighting and heaters to create an inviting, comfortable area - day and night. The design consists of cantilevered poles so no space is lost under the cover itself, maximising the area available for seating.

All our parasols can be branded to complement each business with company name, logos and images. We also provide an option to add an electric remote control to raise and lower the parasol.

## Case Study

Opened in July 2017 as the in-house café at the MotoCorsa motorcycle dealership in Gillingham, Dorset, the owners of Café Newt wanted to be able to extend their outdoor space and offer their loyal and new customers a relaxing space to enjoy a coffee or light meal whatever the weather.

Our design team surveyed the space and recommended the installation of Prostar parasols to complement the scenic gardens and space available.

Not only will the new parasols provide protection and shade against the summer sun but with their cantilevered poles, no space underneath has been lost enabling Café Newt to maximise their covers all year round.

## Awnings

Awnings are an elegant and versatile option for those who need complete shielding from the elements on a daily basis. Not only will they offer shade from the sun but they also help to cool the inside of buildings. Ideal for hospitality businesses, they also offer create an all-weather area for schools and educational establishments looking to extend their useable space.

We can supply and install a variety of awnings in different designs to fit all situations. A huge selection of colours, fabrics and cassette styles are available to create a bespoke design for each customer.

Awnings also offer exceptional branding opportunities for businesses who wish to stand out from the crowd. All branding and sign writing is carried out in-house at our Dorset factory, to give you continuity of your brand outside. Stunning LED lighting in the arms, elbows, and under box add a chic, stylish finish to the awnings, whilst heaters can ensure extended usage in all weathers.

# Giant Umbrellas

Our giant umbrellas are in a class of their own. These large span umbrellas allow commercial establishments to maximise the use of their outdoor space and deliver a quick return on investment by enabling them to offer more covers.

Hotels, restaurants, cafés, pubs and resorts rely on our giant umbrellas for their superior strength, proven stability and elegant look, combined with sophistication and meticulous workmanship. We have a huge variety of styles available and our in-house design team offer branding and sign-writing to suit your own individual image.

Opting to add LED lights and heaters will create a warm and inviting space, meaning your customers will stay longer to enjoy the delights that your business has to offer and extend your al fresco season.

## Case Study

### Banana Wharf, Poole

The prestigious Delicious Dining Group were looking to add a feeling of class and comfort to their new outdoor seating area at Banana Wharf, in order to maximise their clients' dining experience whilst taking in views of the marina. In addition to this, they required sun protection to the inside dining room and new signage above the door.

We offered the client a complete 'one-stop-shop' service, which included the installation of a bespoke canopy, two giant umbrellas with heaters and lights, three electric sun screens, illuminated signage, menu cases and window graphics.

As well as protecting diners eating inside the restaurant, customers choosing to dine and enjoy a drink outside can be protected from the sun and other weather conditions under one of the two four metre by four metre giant umbrellas, which each incorporate four 1.5kw heaters and fluorescent lighting.

*"Broadview offered a complete service for Banana Wharf in Poole. In every aspect of their work, we found Broadview to offer excellent service delivered to timescales and always with professionalism."*

*Steve Hughes, Director at Delicious Dining Group*

# Pergolas

Our extensive range of pergolas with rotating and/or retracting roofs are the ideal solution for those businesses looking to create a useable space outdoors in all weathers.

Al fresco dining is in high demand during the spring and summer months so take advantage of this with one of our stunning pergolas. You can enclose the space with sliding glass, add intimate lighting details and heaters to create a truly unique experience for your customers.

Our bespoke design options ensure we work with you to create the perfect addition to your business which is both practical and aesthetically pleasing. Pergolas can offer extra cover space on busy days, guarantee functions throughout the summer whatever the weather and provide a year-round, functional and profitable space. We can even add separate entrance doors to enable you to offer the area on an exclusive basis for special events.

## Case Study

### The Navigator, Swanwick

The Navigator is part of the prestigious Upham Pub Group and is located in a prime location opposite the marina. Keen to capitalise on an under-used outside seating area which was limited to use during fine weather only, the owners identified that during busy periods they could fill the restaurant twice over so they called in Broadview for advice.

We recommended and installed a Brustor B200 pergola. Its rotating louvre roof and sliding glass wall panels offered flexibility and style. During the summer, the terrace can be opened up whilst in the winter, a warm and ambient environment is created at the flick of a switch. The roof and the doors close to give an extension to the restaurant, with heaters and lighting offering a cosy and stylish finish.

The client was thrilled with the outcome and they are now fully utilising the terrace area all year round as part of normal restaurant business and special events, whatever the weather and at any time of the year.
